

OUR STARTUP

— **ANALYTICS PRO**

Insight as a capital

— A Look on Data Generation every day

Banking and securities

Helps in reducing Fraudulent Transactions

Communications & Media

For simultaneous real time reports of several Platforms

Healthcare

to collect public health report and identify global spread of various viruses.

Education

To update and upgrade prescribed literature for rapid growth

Manufacturing

To enhance Supply Chain Management

Insurance

For developing new products and handling claims through analytics.

Consumer Trade

To enhance Supply Chain Management

Transportation

For better managing traffic plan and logistics

Energy

Helps in measuring Electricity usage with Smart meters

Sports

To monitor the performance of individual players and teams by analysis

Retail stores, educational academies, online websites, tourism organizations and many more...

How to use this data

8 Ways of Applying date science to your business

Empowers
management to
make better decisions

Helps identify trends
to stay competitive

Increase the efficiency
and commitment to
staff in handling core
tasks and issues

Identifies and acts
upon opportunities

Promotes low risk
data-driven action
plans

Validate
Decisions

Helps in selecting
target Audience

Facilitates sensible
recruitment of talent

“Information is the oil of the 21st century and analytics is the combustion engine”

- ***Peter Sondergaard
(Gartner Research)***

— My 10 points to discuss

1. Elevator Pitch
2. Problem / Need
3. Our Solution
4. Market Size
5. Business Model
6. Competition
7. Marketing Strategy / Plan
8. Team
9. Traction/ Projection
10. Needs

Capital :-

All those man-made goods which are used in further production of wealth is called as a capital.

— 1. Elevator Pitch

Short Summary of our Idea :-

we solve business problems of many organizations / Industries by providing Insights and predictions to help them taking decisions and to make good strategies of their business to gain profits. We make money by charging them with these insights and predictions.

— Next Three points in a one go

2. Problem / Need

As this much lot of data is generating every day there is no proper way to store, use and make this data sense and meaningfull. So most of the data from some small Industries and retails remains unuseful.

3. Solution

So we use this data by performing data analysis that will draw insights for their bussiness problems and make predictions by building machinelearning models.

4. Market Size

There is a huge market for these analytics technologies in local of our current city to a global Industries across the country like retails, shopping malls to Textile Industries and Mills.

— Next Three points in a one go

5. Business Model

This basically discuss about how we make money. As we draw insights and make predictive analysis for the clients and charge them money for that.

6. Competition

Since there is lot of demand for this technology so more and more requirement is there so competition is not a problem but we can be unique by advertise our client products along with analytics

7. Market Strategy/ Plan

Along with performing analytics and predictions we can also offer courses to students and conduct workshops with colleges and with some organizations which are sources for our advertisements

— Next Three points in a one go

8. Team

We had a good team with all the required skills from all the required branches who have strong will power and great communication skills. Our Team is good at analytical skills which is mainly required.

9. Traction / Projections

This is about what we have achieved till now. We have great skills in data science, ML, tableau, Analytics, webdevelopment, RPA, we are youtubers also, Top 30 performer of BI, SIH winners, Worked on 30+ real time projects.

10. Needs

This is about what will be the cost and what are the requirements for this. This requires a low budget as all of our working software are open source and do not need much high configuration hardware and servers.

Online Courses for Students

As these are the trending technologies students show much interest in these technologies so that we can provide them online courses and can conduct workshops in colleges in this way also we can make money.

EDUCATION PRESENTS

ONLINE COURSES Available!

MONDAY THROUGH FRIDAY
10:00AM-3:00PM

WE HAVE OVER 300 ONLINE COURSES TO CHOOSE FROM.

GET STARTED TODAY!

ENROLL ONLINE AT
WWW.ONLINECOURSES.COM

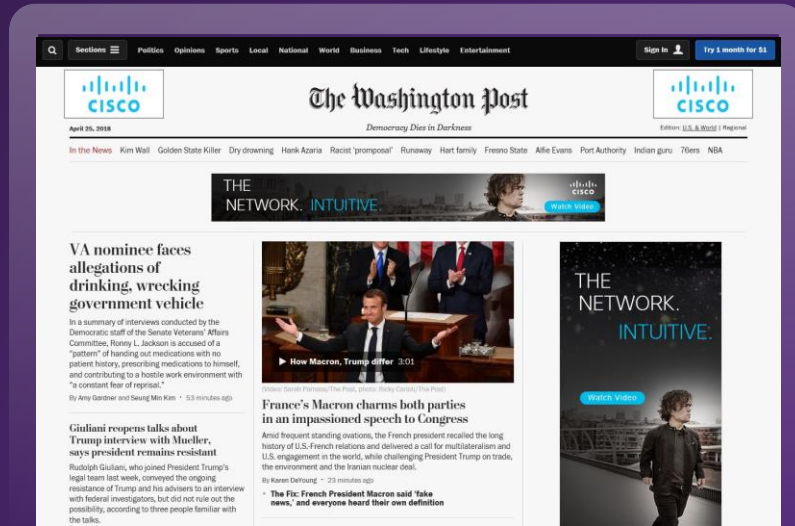

FOR MORE INFORMATION
CONTACT US AT 788-744-7363

COURSES INCLUDES:

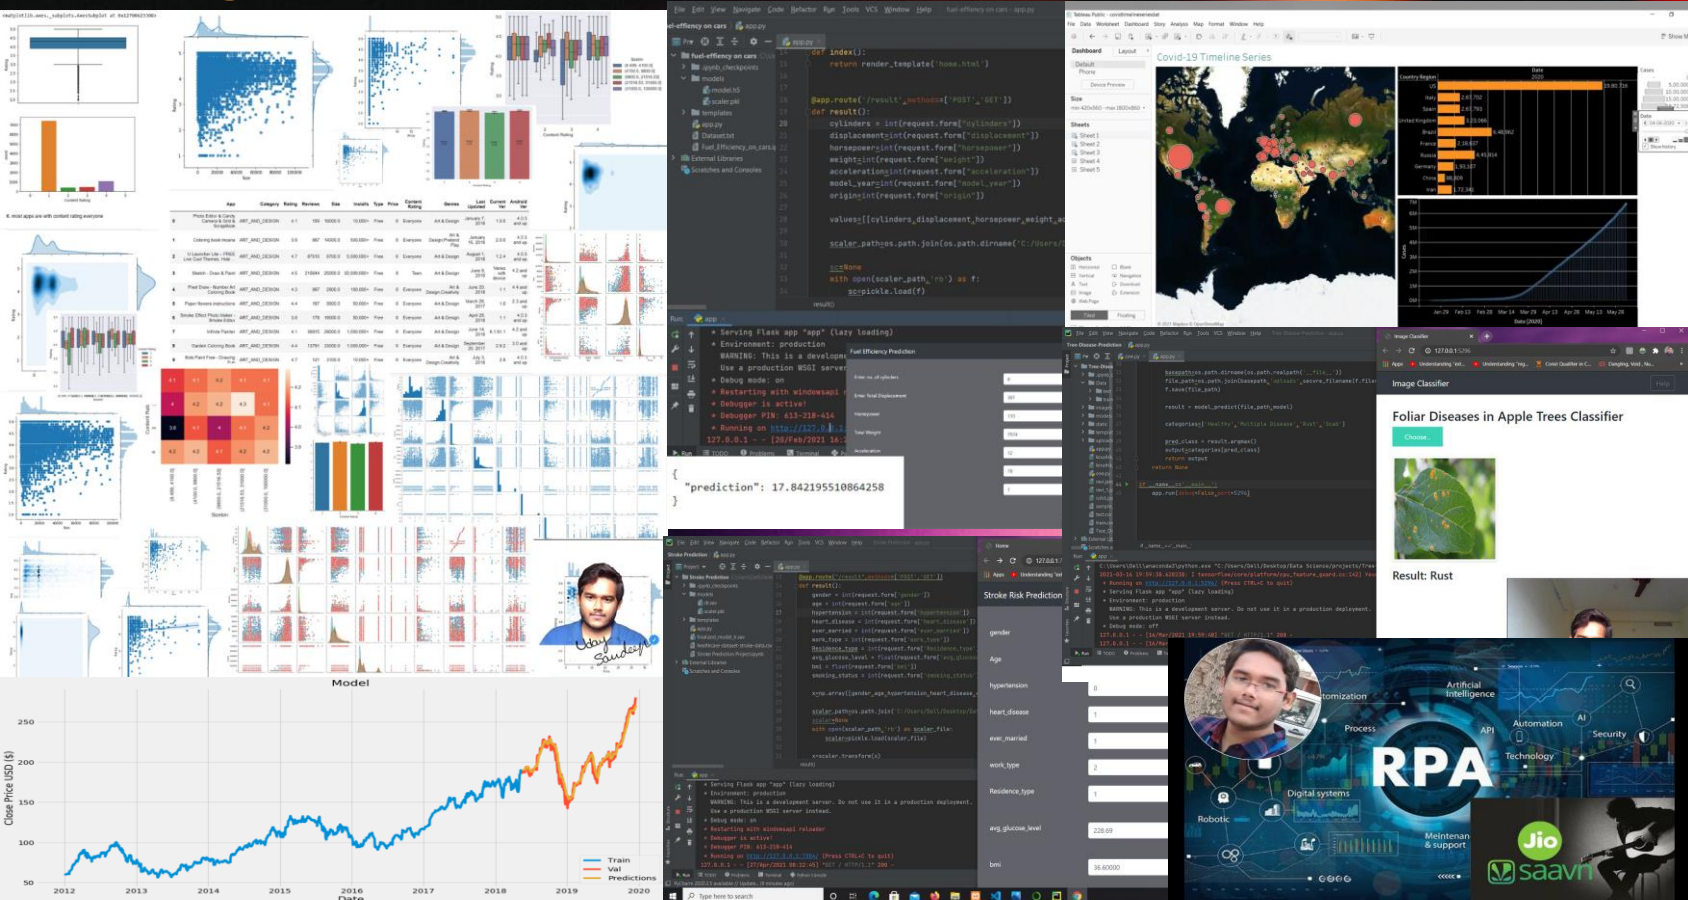

- TEACHER ACCESS
- LEARNING VIDEOS
- CERTIFICATE OF COMPLETION
- DOWNLOADABLE RESOURCES
- & MORE!

Our website

We can create a local website for people to know about the latest news of their town and use this to advertise and can charge money. So that with this we can perform analytics with the latest news and advertisements and know our target audience for us and for our clients as well.
